1. About Suwela and who uses it

Suwela Medical Hub connects everyone involved in a patient's care in one system. A doctor writes a consultation and prescription, the prescription goes to the patient's chosen pharmacy, test requests go to a laboratory, and the results come back to both the doctor and the patient. Patients stay in control: a doctor can only see a patient's records after the patient approves an access request.

Who	Uses Suwela to...
Patients	Keep their health records, consultations, prescriptions, lab results and uploaded reports in one place; book doctors and lab tests; decide which doctors may see their data. **Always free.**
Doctors	Find patients, write consultations and prescriptions, send lab requests, receive lab reports, manage appointments and channel at hospitals or clinics.
Hospitals and clinics	Run an organisation dashboard for their doctors and staff: consultations, lab reports, access requests, appointments and channeling, and the team.
Pharmacies	Receive prescriptions, dispense and notify patients, manage medicines, suppliers, purchase orders, sales and stock.
Laboratories	Receive test requests, record results, upload and send reports, and publish a catalogue of tests.

Who	Uses Suwela to...
Suwela administrators	Approve registrations, manage users, organisations, packages and payments, and look after the shared medicine and supplier lists.

The system works in **English and Sinhala**. Use the language switcher at the top of the screen to change language at any time.

2. Website addresses and links

2.1 The main addresses

Address	What it is	Who uses it
www.suwela.com	The public website (landing page). Information about Suwela, plus registration and sign-in.	Everyone
app.suwela.com	The application: the patient, doctor, hospital, clinic, pharmacy and laboratory dashboards.	All registered users
dashboard.suwela.com	The main administration dashboard (operator console).	Suwela administrators only
admin.suwela.com	A second, easy-to-remember address for the same administration dashboard.	Suwela administrators only

Good to know: You do not have to remember which address to use. Sign in at www.suwela.com and the system sends you to the right dashboard automatically, and keeps you signed in when it moves you between addresses.

2.2 Public pages (landing site)

Page	Link	Description
Home / landing	www.suwela.com/	Introduction to Suwela, the roles it serves and how the care journey works. Buttons to register or sign in.
Explore	www.suwela.com/explore	Explore what Suwela offers each type of user.
News	www.suwela.com/news	News and updates from Suwela.
Share your story	www.suwela.com/share-story	Patients and professionals can share their experience with Suwela.
About	www.suwela.com/about	About the company and the mission behind Suwela.
Help	www.suwela.com/help	Help centre with answers to common questions.
Compliance	www.suwela.com/compliance	How Suwela protects health data and meets its legal obligations.
Privacy policy	www.suwela.com/privacy	How personal and medical data is collected, used and protected.
Terms of service	www.suwela.com/terms	The terms every user accepts when registering.

2.3 Account pages

Page	Link	Description
Sign in	www.suwela.com/login	Sign in with email and password (or Google for patients).
Register (patient or doctor)	www.suwela.com/register	Create a patient account or an individual doctor account.

Page	Link	Description
Register an organisation	www.suwela.com/org-register	Register a hospital, clinic, pharmacy or laboratory, with its owner account.
Verify email	www.suwela.com/verify-email	Enter the 6-digit code sent to your email after registering.
Forgot password	www.suwela.com/forgot-password	Ask for a password reset link by email.
Reset password	Opened from the email link	Choose a new password. The link in the email brings you here; it works once, for 1 hour.
Choose dashboard	app.suwela.com/choose-dashboard	Shown when one person belongs to more than one dashboard (for example a doctor who also works at a hospital).

2.4 Dashboard home pages

Dashboard	Link
Patient	app.suwela.com/patient
Doctor (individual)	app.suwela.com/doctor
Hospital	app.suwela.com/hospital
Clinic	app.suwela.com/clinic
Pharmacy	app.suwela.com/pharmacist
Laboratory	app.suwela.com/laboratory
Main administration	dashboard.suwela.com/admin or admin.suwela.com/admin

3. The dashboards at a glance

Dashboard	Who registers	Where to register	Approval needed?	Package
Patient	Any member of the public	Register › Patient	No, ready straight away	Always free
Doctor	An individual doctor	Register › Doctor	Yes, by Suwela admin	Chosen at registration
Hospital	Doctor or director (owner)	Register organisation › Hospital	Yes, by Suwela admin	Chosen at registration
Clinic	Doctor or owner	Register organisation › Clinic	Yes, by Suwela admin	Chosen at registration
Pharmacy	Pharmacist or owner	Register organisation › Pharmacy	Yes, by Suwela admin	Chosen at registration
Laboratory	Lab director	Register organisation › Laboratory	Yes, by Suwela admin	Chosen at registration
Main admin	Not open for registration	Created by Suwela	n/a	n/a

Staff of an organisation (for example a second pharmacist or a lab technician) do not register themselves. The organisation owner invites them from **Team** in the organisation dashboard, and they can sign in at once.

4. How to register

4.1 Patient

1. Open www.suwela.com/register (or click **Register** on the home page).
2. Choose **Patient**.
3. Either click **Sign up with Google**, or fill in your **full name, email address and password** (at least 10 characters) and confirm the password.
4. Read and accept the Terms of Service and Privacy Policy, then click **Create account**.
5. If asked, open your email and type the **6-digit verification code** (see 4.4).
6. You are signed in and taken to your patient dashboard. A **welcome email** with getting-started tips is sent to you.
7. Complete your profile in **Settings** so doctors and labs have what they need.

> **Good to know:** Google sign-up and sign-in is for **patient accounts only**. Doctors, pharmacies, laboratories and organisations always use their email and password.

4.2 Doctor (individual practice)

1. Open www.suwela.com/register and choose **Doctor**.
2. **Choose a package.** Compare the packages and select one. You can change it later.
3. Fill in the form: full name, email, password, **phone number, specialization, medical licence number (e.g. SLMC-12345)**, years of experience, medical school, your main hospital or clinic (search

for it on Suwela, or type its name), other hospitals or clinics where you work, consultation fee (LKR) and a short bio.

4. Accept the terms and click **Create account**.
5. Verify your email with the 6-digit code if asked. You receive a **"registration under review"** email.
6. The Suwela team checks your licence details. If you named a hospital or clinic on Suwela, that organisation may be asked to certify that you work there.
7. When you are approved you receive an **"account approved"** email. Sign in at www.suwela.com/login and you are taken to the doctor dashboard.

Important: Until your account is approved, signing in shows a **"Waiting for approval"** message instead of the dashboard. This is normal; there is nothing else you need to do.

4.3 Organisation: hospital, clinic, pharmacy or laboratory

Open www.suwela.com/org-register (or click **"Running a pharmacy, lab, hospital or clinic? Register your organisation"** on the registration page). Registration has five steps:

Step	What you do
1. Organisation type	Choose **Hospital**, **Clinic**, **Pharmacy** or **Laboratory**.
2. Package	Choose the package for your organisation.
3. Organisation details	Organisation name and the other basic details of the organisation.
4. Role details	**Hospital / clinic:** phone, medical licence number, years of experience, specialization. **Pharmacy:** phone, pharmacy licence number, pharmacy name and address. **Laboratory:** laboratory name, phone, licence number, lab type, address, website (optional).
5. Owner account	Who owns the dashboard. Search for an **existing Suwela user** (for example a doctor who already has an account), or create a new owner with full name, email and password.

After you submit, the registration goes to the Suwela team. The owner receives a **"registration under review"** email, and an **"approved"** email once the organisation is approved. The owner then signs in at www.suwela.com/login and is taken to the organisation's dashboard.

4.4 Email verification code

- After registering you may be asked for a **6-digit code**. It is emailed to you from **no-reply@suwela.com**.
- The code is valid for **15 minutes**. Type it on the "Verify email" screen. The email also has a button that opens that screen.
- Did not receive it? Check your spam folder, then use **Send a new code** (available after 60 seconds).
- Until the email is verified, signing in asks you for the code again.

5. How to sign in

5.1 Every user

1. Open www.suwela.com/login (or click **Sign in** on the home page).
2. Type your **email address** and **password** and click **Sign in**. Patients can click **Sign in with Google** instead.
3. If two-factor authentication is switched on for your account, type the 6-digit code from your authenticator app.
4. You are taken to your own dashboard automatically.

5.2 Where each person lands

Account	Lands on
Patient	app.suwela.com/patient
Doctor	app.suwela.com/doctor
Hospital or clinic owner / staff	app.suwela.com/hospital or app.suwela.com/clinic
Pharmacy owner / staff	app.suwela.com/pharmacist
Laboratory owner / staff	app.suwela.com/laboratory
Suwela administrator	dashboard.suwela.com/admin

5.3 People with more than one dashboard

A doctor can have a personal doctor dashboard **and** belong to one or more hospitals or clinics. After signing in, such a user sees the **Choose dashboard** page (app.suwela.com/choose-dashboard) and picks where to work. The **dashboard switcher** at the top of the screen moves between them at any time, without signing in again.

5.4 Messages you might see when signing in

Message	What it means and what to do
Waiting for approval	Your registration is being reviewed by the Suwela team. You will get an email when it is approved.
Account deactivated	An administrator has turned the account off. Contact Suwela support.
Verify your email	Enter the 6-digit code sent to your email (or ask for a new one).
Package expired / dashboard locked	The monthly payment was not recorded in time. See section 7. Your data is safe.
Google sign-in is only for patient accounts	This email belongs to a doctor, pharmacy, lab or organisation account. Sign in with email and password.
Invalid email or password	Check what you typed. If you have forgotten the password, use **Forgot password?** (section 6).

5.5 Logging out

Open the side menu (or the menu on a phone) and choose **Log out** (bottom of the side menu). Always log out on shared computers.

6. Forgot password and account recovery

The same recovery steps work for **every** account: patients, doctors, hospitals, clinics, pharmacies, laboratories and administrators.

6.1 I cannot sign in: reset my password

1. On the sign-in page click **Forgot password?** (or open www.suwela.com/forgot-password).
2. Type the email address of your account and click **Send reset link**.
3. Open the email **"Reset your Suwela password"** and click the button. The link works **once** and for **1 hour**.
4. Choose a new password (at least 10 characters; the strength bar helps) and confirm it.
5. Sign in with the new password. For your safety you are signed out on all other devices, and a **"Your password was changed"** email is sent.

> **Tip:** If the link has expired or was already used, the page says **"Link expired"** and offers to send a new one. Asking for a new link cancels the older ones. At most 5 links can be sent per hour for one account.

6.2 I am signed in: change my password or send a reset link

Every dashboard has **Settings › Password & account recovery**:

- **Change password:** type your current password and the new one twice, then save.
- **Email me a reset link:** sends a reset link to your account email, useful if you have forgotten the current password while still signed in.
- The panel also lists the recovery steps, so staff can follow them without this guide.

Dashboard	Where to find "Password & account recovery"
Patient	Settings (from your name menu)
Doctor, hospital, clinic	Settings
Pharmacy	Settings
Laboratory	Settings
Main administration	Settings (also where two-factor authentication is set up)

> **Important:** If you receive a **"Your password was changed"** email and you did **not** change it, reset your password immediately using Forgot password, then contact Suwela support.

7. Packages, payments and expiry reminders

Doctors and organisations (hospitals, clinics, pharmacies and laboratories) use a package. Free packages never expire. Paid packages run **month to month**. **Patients are never billed.**

7.1 My Package page

Open **Package** in the dashboard menu to see your package, what it includes, how much of it you have used this month, your payment history and the date the current month ends. Menu items that are not in your package show a short "not in your package" message with an option to upgrade.

7.2 Upgrading or downgrading

1. Open **Package** and pick the new package. You can add a message to the Suwela team (for example "We are adding two more doctors next month").
2. An administrator approves the change. You get a notification when it is decided.
3. If your current month is already paid, the new package starts when it ends, so you never lose paid days. Otherwise it starts straight away.

7.3 Reminders and what happens at expiry

When	What happens
7 days before expiry	Banner in the dashboard and a reminder email to the account holder. The Suwela administrators also get an email alert.
3 days before	Reminder email to the account holder.
1 day before	Last reminder email to the account holder, plus another alert to the administrators.
Expiry without payment	The dashboard is **locked**. The holder gets an "expired" email with payment instructions; the administrators get an "account locked" alert.
Payment recorded	The Suwela team records the payment (usually the same working day). The dashboard opens again at once for another month.

Good to know: Nothing is deleted while a dashboard is locked. Records, patients and settings are kept safe, and notifications and the Package page still work.

8. Patient dashboard

Address: app.suwela.com/patient. Register as described in 4.1. The first time you sign in, a **Welcome to Suwela!** prompt helps you complete your profile.

Menu item	What you can do there
Patient Information (home)	Your personal details and **Vitals Overview** (blood work, CBC, metabolic values, vital signs). Update vitals by hand, or they update automatically when a lab sends a report. Download a full **Patient Health Report** as a PDF.
Consultations	Every visit, newest first; click a visit to expand it. Use **Record Visit** to log your own visit or observation. You can **send tests to a laboratory** of your choice from a consultation.
Medical Flow	Your complete health journey: every visit, prescription and lab result in time order.
Lab Tests	All your lab reports. Use **Book a Lab Test** to book a test yourself; tests your doctor assigns also appear here.
My Reports	Upload your own documents (old reports, scans, letters) with **Upload Health Report**. You can delete a report you uploaded.
Doctor Requests	Doctors ask permission here before they can see your data. **Approve** or **decline** each request; you choose which kind of data (personal details, vitals, lab reports, prescriptions, uploaded reports).
Book Doctor	See doctors' available slots and book an appointment (**Book a Doctor Appointment**). Your bookings are listed here.
Settings	Complete your profile (contact, address, insurance and medical details), choose language, and **Password & account recovery**.

Typical journey

1. Register and complete Settings.
2. Book a doctor (Book Doctor) or visit one.
3. Approve the doctor's access request (Doctor Requests).
4. After the visit, see the consultation and prescription (Consultations). The pharmacy notifies you when the medicine is ready.
5. Results from the laboratory appear in Lab Tests and update your Vitals Overview.

9. Doctor dashboard

Address: app.suwela.com/doctor. Register as described in 4.2 and wait for approval.

Menu item	What you can do there
Dashboard (home)	**Patient Search:** start typing a name to find any registered patient and open their profile. Also shows your **professional profile** and **recent consultations**.
Consultations	**New Patient Consultation:** record the diagnosis and prescription, **assign a pharmacy and laboratory**, and notify the patient in one step. Edit a consultation later if needed.
Lab Reports	**New Lab Request** assigns a test to a patient. Track tests you sent; when a report is complete, **request access**. The patient must approve before you can view it.
Patients	Everyone you have treated, been given access to, or have an appointment with. Open a patient to see the data you are allowed to see.
Access Requests	Ask a patient for access to their data: personal details, vitals, lab reports, consultation and prescription history, or uploaded reports. Or use **Request Full Access**. See the status of every request you sent.
Appointments	Publish your available slots, accept or **decline** booking requests, and manage **My Hospitals / Clinics**: request to channel at a hospital or clinic (it reviews and accepts you).
Settings	Keep your professional profile up to date (specialization, fee, bio, hospitals), and **Password & account recovery**.
Package	Your package, usage, payments and upgrades (section 7).

Good to know: Some menu items depend on your package (for example Lab Reports, Access Requests and Appointments). If one is not included, the page explains this and lets you upgrade.

10. Hospital and clinic dashboards

Addresses: app.suwela.com/hospital and app.suwela.com/clinic. Register as described in 4.3. The owner and the doctors and staff the owner invites all sign in at the normal sign-in page.

Menu item	What you can do there
Dashboard (home)	Overview of the organisation, recent activity and **Staff Members**.
Consultations	Consultations and prescriptions written by the organisation's doctors (same tools as the doctor dashboard).
Lab Reports	Lab requests sent by the organisation and the reports received.
Access Requests	Requests to patients for access to their records.
Appointments	Appointments and **channeling** sessions at the organisation.

Menu item	What you can do there
Team (owner only)	**Invite Team Member** (name, email, password of at least 10 characters; optionally make them a co-owner). They can sign in at once. Remove members. Removing a doctor sends them a request they must accept. Review **Channeling Requests** from doctors who want to channel here (check their proposed hours, then accept). **Certify** doctors who registered and said they work here. Confirm only if they really do; the Suwela team then approves them.
Settings	Organisation and personal profile, and **Password & account recovery**.
Package	The organisation's package, payments and upgrades (section 7).

11. Pharmacy dashboard

Address: app.suwela.com/pharmacist. Register the pharmacy as described in 4.3.

Menu item	What you can do there
Dashboard (home)	**Incoming Prescriptions**, revenue and cost, stock health with **reorder suggestions**, and the **top-selling medicines** of the last 30 days.
Prescriptions	Prescriptions assigned to your pharmacy by doctors and patients. Move each one through: **Preparing** › **Dispensed / ready for pickup** › **Delivered**. The patient is notified at each step. Withdrawn prescriptions show as cancelled.
Medicines	Your medicine list: add, edit or delete medicines, prices and stock levels.
Suppliers	Add, edit or delete suppliers.
Orders	Create a **New Purchase Order** to a supplier. When the goods arrive, mark the order **received** and stock is updated automatically.
Sales	Point of sale for over-the-counter sales, and the sales history.
Inventory	Stock and inventory reports.
Team (owner only)	Invite and remove pharmacy staff.
Settings	Pharmacy profile (name, address, licence) and **Password & account recovery**.
Package	Package, payments and upgrades. Orders and Inventory depend on the package.

12. Laboratory dashboard

Address: app.suwela.com/laboratory. Register the laboratory as described in 4.3.

Menu item	What you can do there
Dashboard (home)	Requests waiting, with a warning for requests **overdue**; recent activity; the **laboratory profile** and **services offered** (edit with Edit Laboratory Profile).
Lab Reports	Process test requests from doctors and patients: **Start Processing** (sample taken), **Enter Test Results** directly (so the patient's vitals update instantly), or **Upload Lab Report** as a file. **Send Lab Report** notifies the patient and the doctor together. **Reject** a request with a reason if it cannot be done.
Catalog	Your list of tests and prices. Use **Add Test** to add one; edit or remove existing tests. Patients and doctors choose from this catalogue.
Team (owner only)	Invite and remove laboratory staff.
Settings	Laboratory profile and **Password & account recovery**.
Package	Package, payments and upgrades.

13. Main administration dashboard

Addresses: dashboard.suwela.com/admin or admin.suwela.com/admin. Only Suwela administrators can open it. Administrator accounts are created by Suwela; they cannot be registered from the website. The main administrator account is **tharushatheekshana60@gmail.com**.

13.1 Signing in as an administrator

1. Open admin.suwela.com (or www.suwela.com/login). You are taken to the sign-in page.
2. Enter the administrator email and password.
3. If two-factor authentication is on, enter the 6-digit code from your authenticator app.
4. You arrive at the **System Dashboard**.

Important: Administrators should switch on **two-factor authentication** (Settings › scan the QR code with Google Authenticator or Authy, then enter the code). Never share the administrator password; keep it in a password manager and change it from Settings › Password & account recovery.

13.2 Admin menu

Menu item	What you can do there
Dashboard	System overview for every tenant. Shows how many **organisations are waiting for approval** (with a link to review them), billing status, and **Recent View As activity** (which administrator viewed the system as which user).
Organizations	All hospitals, clinics, pharmacies and laboratories. **Approve** self-registered organisations (the owner gets an "approved" email), activate or deactivate them, **Provision Organization** to create one directly, and **Add Member** to an organisation.
Users	Create, edit and manage every user; search by name or email. **Approve** doctors and other professionals waiting for approval (they get an "approved" email), deactivate or remove users, and **View As**: see the system exactly as a user sees it, to help them. View As sessions are logged.
Packages	Define the packages for every dashboard type (doctor, pharmacy, laboratory, hospital, clinic): price, features and limits. See who is on which package and **change a user's package**.
Billing	**Mark payment received** for an account (this unlocks a locked dashboard immediately and adds a month). See accounts **due in the next 7 and 30 days**, **locked** accounts, and approve or decline **upgrade and downgrade requests**.
Medicines	The shared medicine list used across the system.
Suppliers	The shared supplier list.
Inventory	Inventory reports across the system.
Settings	Administrator profile, **Password & account recovery**, and **two-factor authentication**.

13.3 Daily routine for administrators

1. Check the Dashboard for organisations waiting for approval and approve genuine ones (Organizations).

2. Check Users for doctors and professionals waiting for approval; verify licence numbers before approving.
3. Open Billing: record payments received, check accounts expiring in the next 7 days, and decide package change requests.
4. Read the expiry alert emails: every administrator gets an email when a paid account is about to expire and when it is locked.

14. Emails the system sends

All emails come from **Suwela Medical Hub <no-reply@suwela.com>**. Do not reply to them; contact Suwela support instead.

Email	Sent to	When
Your verification code	New user	After registering (6-digit code, valid 15 minutes).
Welcome to Suwela	New patient	When the account is ready, with getting-started steps.
Registration under review	New doctor or organisation owner	After registering, while the Suwela team reviews it.
Your account is approved	Doctor or organisation owner	When an administrator approves the account or organisation.
Reset your Suwela password	Any user	When "Forgot password" or "Email me a reset link" is used (link valid 1 hour, once).
Your Suwela password was changed	Any user	After a password reset or change, with steps to follow if it was not you.
Package expiry reminder	Doctor or organisation owner	7, 3 and 1 day before a paid package expires.
Package expired: dashboard locked	Doctor or organisation owner	When the package expires without payment, with payment instructions.
Package expiring / account locked alert	All Suwela administrators	At the first reminder, on the last day, and when the account is locked.

15. Common questions and troubleshooting

I did not receive an email.

Check the spam or junk folder and wait a few minutes. Make sure you typed the email address correctly. Then use "Send a new code" or ask for a new reset link.

My reset link does not work.

Links work once and for 1 hour, and a newer link cancels older ones. Ask for a new link and use the newest email.

I registered as a doctor but cannot open the dashboard.

Your account is waiting for approval. You will receive an "approved" email; then sign in again.

Google sign-in says it is only for patient accounts.

Professional and organisation accounts must use email and password. Use "Forgot password?" if you never set one.

A menu item says it is not in my package.

Open Package and request an upgrade. An administrator approves it.

My dashboard is locked.

The package expired without payment. Make the payment; once the Suwela team records it the dashboard reopens. No data is lost.

As a doctor I cannot see a patient's records.

Send an access request. The patient must approve it in Doctor Requests.

How do I add staff to my pharmacy, lab, hospital or clinic?

The owner opens Team › Invite Team Member. Staff do not register on the website.

How do I change language?

Use the language switcher at the top of the screen (English or Sinhala).

For anything else, visit the Help centre at www.suwela.com/help.
